

The AMOMATIC logo is a dark green rectangle with the word "AMOMATIC" in white, bold, sans-serif capital letters. A white arrow points upwards from the top center of the rectangle.

AMOMATIC

Considered the best by users

A large, green industrial asphalt plant structure, identified as the Container Model. It features multiple levels with metal walkways and railings. The plant is set against a blue sky with scattered white clouds. The AMOMATIC logo is visible on a panel on the side of the structure.

CONTAINER MODEL ASPHALT PLANTS

Your Road to Success

CONTAINER MODEL ASPHALT PLANTS

Amomatic's CM (Container Model) asphalt plants are an innovative and cost-efficient solution for producers that require flexibility or need to access remote locations. All modules are built in CSC certified sea containers. Asphalt plant assemblies and relocations are now easier than ever.

COST-EFFICIENT TRANSPORTATION

All of the CM plant's modules are integrated into CSC certified sea containers, making it possible to easily ship an asphalt plant anywhere in the world.

As all CM modules are integrated into sea containers, transportation costs can be reduced up to 75 % when comparing with a standard plant. This makes the Container Model an excellent choice for manufacturers with multiple project locations or that need to access remote areas.

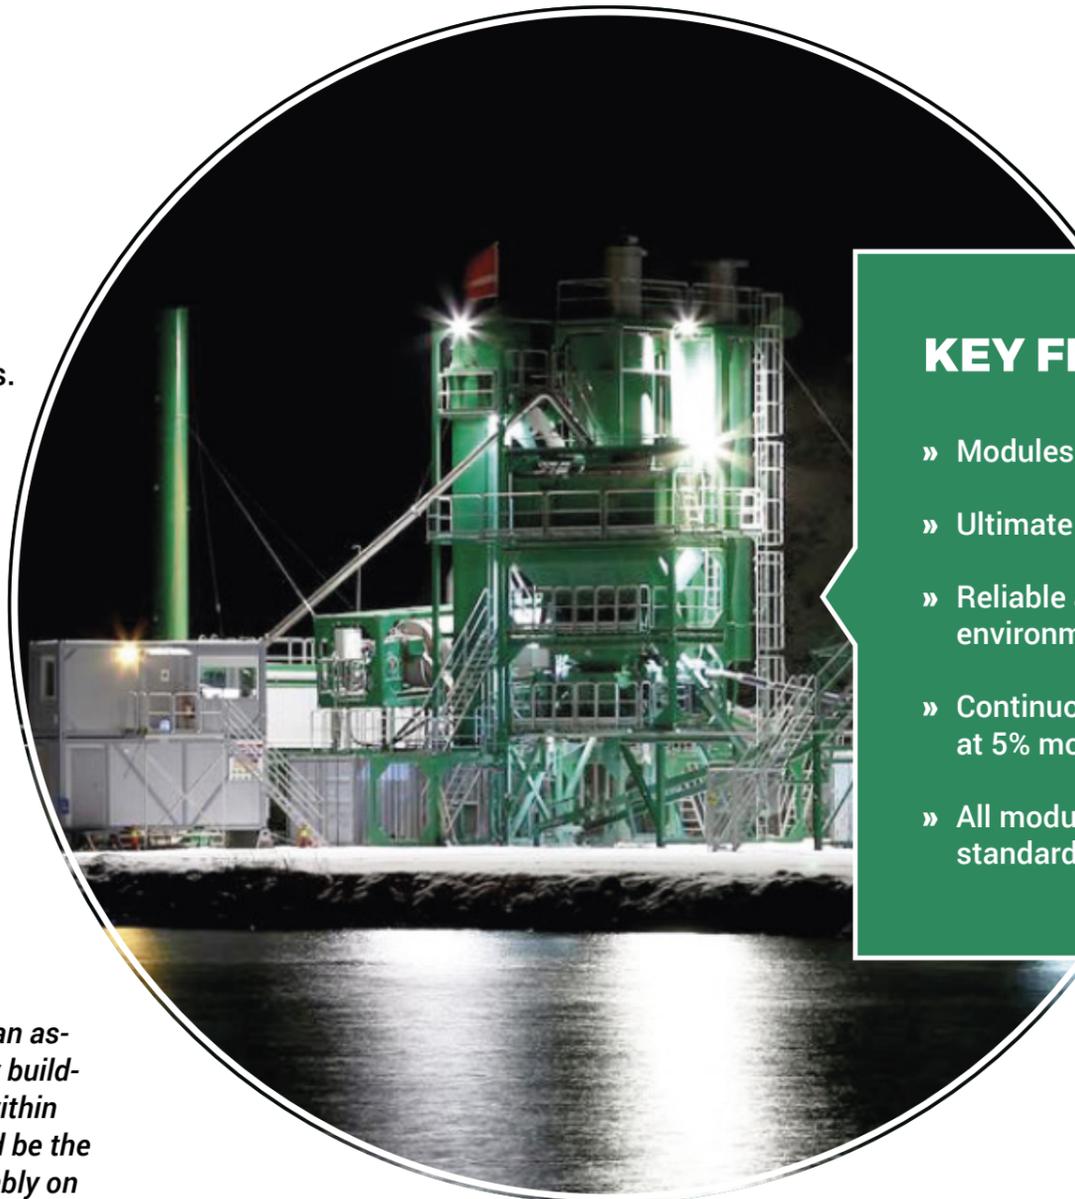

EFFORTLESS ASSEMBLY AND RELOCATION

Thanks to Amomatic's design, erecting an asphalt plant is as easy as assembling toy building blocks, as all modules are prebuilt within sea containers. This leads to what could be the easiest and fastest asphalt plant assembly on the market.

Containers are fastened together using a quick locking system, therefore guaranteeing minimal assembly time. With Amomatic's CM, asphalt plant relocations have been significantly facilitated and can now be performed within days.

Since 1919, all of our products and services have been designed and manufactured in Finland.

KEY FEATURES

- » Modules are built in CSC certified sea containers
- » Ultimate flexibility for asphalt manufacturers
- » Reliable asphalt production even in the toughest environments
- » Continuous plant capacity of 120 or 160 t/h at 5% moisture
- » All modules are compatible with the ISO 1496-1 standard

COMPACT SIZE WITH FULL FEATURES

Despite its relatively small size, Amomatic's CM has all the most important features of a stationary asphalt plant.

For example, the filler supply system is full-sized, allowing the manufacturer to always decide the exact composition of the asphalt mix.

AMOMATIC

QUALITY SINCE

1919

SPECIALISED IN ASPHALT PLANTS

Amomatic started its operation in 1919 as a blacksmith's shop by the name of Vähäsilta. During the course of our history we have produced everything from iron bars to a submarine frame – a testament of our versatility. Since the 1960s we have specialised in asphalt plants. We continue to bring forth new innovations in modularity and mobility as well as digitalisation and environmental friendliness.

Contact Us

Amomatic's manufacturing plant, service centre and head office are in Paimio, Finland. Our opening hours are from 8 am to 4 pm Monday to Friday. During this time, you can either come for a visit or contact us by phone at **+358 2 477 100**.
